

THORNE HEALTH HAVEN

OUR MISSION:

Thorne Health Haven is a non-profit organisation for the local community with an exciting opportunity to grow together and share good health and well-being for all.

We combine a wide range of conventional and natural medicine treatments and therapies.

Invested by the people for the people, we invite you to take ownership of your health journey with us, whether a volunteer or recipient.

The focus will be on love, hope and natural positive healing for you and your family.

WHAT WE OFFER:

We invite you to Thorne Health Haven, where we have heart-driven practitioners that deliver integrative healthcare services for the optimum well-being of you and your family.

Derived from the moral and ethical principles of the Public Health Alliance (PHA), we support the public on their health journey.

We will support and help you with your challenges and encourage you to take future ownership of your health.

We offer a free consultation, and your first treatment is a minimal cost of £10.

We have a triage service that will match your needs with the best possible therapist.

However, you can also try other therapies for £10 per initial treatment.
